

DEMO OVERVIEW

```
loyalty_id,member_id,points,date  
100,79,19,2014-03-29 09:44:45  
101,80,8,2014-03-25 05:51:47  
102,75,4,2014-03-30 14:32:13  
103,43,19,2014-03-25 10:51:41  
104,36,19,2014-03-28 19:03:30
```

- Detect new file to process
- Graphically map file into “loyalty” object for easier handling
- Process each file line
- Apply business rule “AUD = Loyalty point * 5”
- Generate a new query transaction with calculated value
- Execute INSERT query
- Marked file as processed

```
INSERT INTO `transaction`  
(`code`,`member_id`,`amount`)  
VALUES (103,48,1836),(105,47,1254),  
(103,60,2193),(104,78,2227),  
(105,44,852),...
```
